

How to customize the vessel certificate and company certificate list on the web side (Document)

Take vessel certificate list as an example:

The user logs into the OLISS web side and clicks "Vessel Management → Certificate Management → Vessel Certificate" in order to enter the vessel certificate interface. Click the list setting button. In the list setting interface, check the fields you wish to display in the vessel certificate list according to your needs. You can adjust the field sorting by dragging them up or down with the mouse. After completing the configuration, click "Save".

Note:

After the configuration is completed, when viewing the list of vessel certificates, only the fields selected during the configuration will be displayed, and the fields are displayed in the order of the configuration.
