

# How to associate inventory with maintenance tasks (when there is goods consumption) (Document)

After the maintenance task is generated / submitted for approval, according to the approval process node, after the maintenance task passes the "approval" step, the "maintenance list for execution" task will appear on the workbench of personnel with execution authority.

Users can log in to the OLISS web side and perform the operation in the following steps 1-9:

1. Users can log in to the OLISS web side and enter the Workbench interface by default

2. Click on the "Maintenance Order" (near expiration/overdue) under the waiting task

3. Click "Execute" on the right side of the target item

4. Complete the corresponding information (with \* required)

5. When an item is consumed, click "Add" and select the item type

Vessel	Maintenance I...	Eqpt. Name	Maintenance Item	Maintenance ...	Responsible ...	P.I.C.	Maintenance ...	Planned	Operation
LINK OCEA N 1	10.2	主机	曲拐箱	General	Engine Dept.	大管轮	1Month±16 Day	2024-12-	Execute Delay Request
LINK OCEA N 1	10.3	主机	曲拐箱	General	Engine Dept.	大管轮	1Month±16 Day	2024-12-	Execute Delay Request
LINK OCEA N 1	10.4	主机	曲拐箱	General	Engine Dept.	大管轮	1Month±16 Day	2024-12-	Execute Delay Request

**Note:** If the maintenance item is set as required in the related consumption, the item will become a required item with red star (i. e., must be filled in). If not, it cannot be submitted for acceptance;

Add Spares Consumption

Current Stock List Selected Goods List: 0 6. Find the target item through the header search bar

Display Only Critical Spare Parts Search Reset

7. Fill in the stock-out quantity and remarks
