

How to handle approved repair requests (documents) on the web side

Users log in to the OLISS Web side and click in turn **"Repair Management → Repair Application"** Enter the repair application interface, and can quickly find the target documentation (Note: Documentation status filters "Approval Rejected") according to the filtering conditions and keywords. According to the actual situation, "resubmit" or "delete" operations can be performed, and the application form can also be "exported"

1. Click to enter the Repair Application interface in turn

2. Quickly find the target documentation by selecting the "Approval Denied" status based on keywords, filter conditions, or the "Status" key drop-down

3. You can perform "Resubmit" or "Delete" operations according to the actual situation, or "Export" the application form

No.	Repair Appl. Name	Appl. No.	Vessel	Dept.	Priority Level	Planned Repair Date	Planned Repair Place	Rejected	Operation
1	流程	RA-24091801	LINK OCEAN 1	Engine Dept.	Urgent	2024-09-25		All	Resubmit Export Delete
