

Web-based Stock Early Warning Function (Document)

In order to facilitate timely control and management of stock by relevant personnel, OLISS has launched an stock early warning function, making ship stock management more efficient.

After logging in to the OLISS Web platform, users can follow steps 1–3 below on the "Purchase Management → Purchase Application" interface (this document uses spare parts as an example):

2. When the current stock of an item falls below the set minimum stock level, a stock warning list will be automatically generated here

1. Click to enter the "Purchase Application" interface in sequence
