

## Web-side display of key equipment in the purchase management interface (document)

After the user logs in to the OLISS Web side, designates a certain ship and equipment as critical equipment and adds associated equipment (components) in the equipment list interface. In the purchase management module, from adding a purchase item in Purchase Application to completing the purchase order, the user can see a red dot behind the equipment and its associated components, and the equipment-related information associated with the purchase item will also be displayed, which runs through the entire spare parts purchase process and is more in line with actual usage needs.

Display of key equipment in the purchase management module (steps 3-9):

1. Click one by one to enter the "Purchase Application" interface
